

LINKEDIN COPY STRATEGY

Charbel Salameh

LinkedIn Copy v2

Full profile rewrite for Wakeeli founder.

Target: Real estate agency owners in GCC and US.

SECTION 01

Headline Options

BEST OPTION

Built the AI system behind 400K conversations and 36K appointments booked. Now deploying it for real estate agencies so the next lead texts you, not your competitor.

WHY THIS WINS

Leads with the hardest credibility anchor available (400K/36K). Immediately connects proof to the real estate speed-to-lead problem. Ends on competitive pain every agency owner feels. Positions Charbel as a builder and deployer, not a developer or a salesperson. The phrase "not your competitor" activates urgency without being pushy.

SECOND OPTION

36K appointments. 400K conversations. Same AI system, rebuilt for real estate. I help agencies be the first to reply, every time.

WHY IT IS SECOND

Strong proof-first opening and explains the pivot cleanly. Slightly more feature-forward than Option 1 and the competitive angle is softer. Solid but less punchy.

THIRD OPTION

Real estate agencies lose deals every day to whoever responds first. I built the system that makes sure that is always you.

WHY IT IS THIRD

Leads with the pain point and positions Charbel as the builder. Direct and clear. But buries the credibility numbers, which are the strongest hook available. Works better as a post opener than a permanent headline.

About Section

Right now, a lead just texted your agency.

They also texted four others.

Whoever responds first books the tour. Forbes puts it plainly: 35 to 50% of sales go to the first responder. Conversion is 21x higher when you respond within 5 minutes.

You were asleep. Your agents were in showings. Nobody responded for three hours.

You lost that deal before it started.

I spent three years building and running an AI-powered DM system for info coaches. Not as a developer on the sideline. I built the strategy, shaped the conversations, and scaled the entire operation.

The numbers: 400,000 conversations handled. 36,000 appointments booked.

That system worked because it did one thing better than any human could: it showed up instantly, every time, and never dropped a lead.

When I looked at real estate, I saw the exact same problem, just higher stakes. Bigger commissions. Leads shopping five agencies at once. Agents stretched thin across showings, calls, and paperwork.

The same system that dominated info coaching will dominate real estate.

That is Wakeeli.

An AI that lives on your WhatsApp number. It responds in seconds, 24/7. It qualifies the lead, matches them to listings, and books the tour, automatically, before your competitor has even read the notification.

Your agents only step in when the lead is warm and ready to close.

Not a chatbot. A conversion system built on three years of battle-tested AI and 400,000 real conversations.

If you run a real estate agency in the GCC or US and you are tired of losing warm leads to response time, DM me. First conversation takes 15 minutes.

Featured Section

PIN 1

The Speed Problem

A lead texted 5 real estate agencies at the same time.

The first agency to reply booked the tour.

Four agencies spent the next day chasing a cold lead, not knowing they lost before they even called back.

Forbes tracked it: 35 to 50% of real estate sales go to the first responder.

21x higher conversion when you reply within 5 minutes.

Your CRM does not fix this. More agents do not fix this.

Speed fixes this. And speed is the one thing AI never runs out of.

PIN 2

The Origin Story

Three years ago I started running an AI DM operation for info coaches.

We handled 400,000 conversations.

We booked 36,000 appointments.

The leads had no idea they were talking to an AI.

They just got fast replies, relevant answers, and a calendar link when they were ready.

This year I took the same system and rebuilt it for real estate.

Because the problem is identical: high-ticket sales, competitive market, leads shopping multiple options at once, response time determining who wins.

If it worked at that scale for coaches, it works for agencies.

Wakeeli is the proof.

PIN 3

The Real Split

Agency owners tell me their agents are excellent closers.

I believe them.

The problem is not closing. It is that the lead goes cold waiting for someone to pick up the phone.

Speed-to-lead is not a talent problem. It is an infrastructure problem.

AI solves infrastructure. Your agents close deals.

That is the split Wakeeli is built on.

Outreach DM Script

Hey [Name],

Quick context: I spent 3 years running an AI DM system that handled 400K conversations and booked 36K appointments for info coaches.

I rebuilt that same system for real estate. It sits on your WhatsApp number, responds to leads in seconds 24/7, qualifies them, matches listings, and books tours automatically.

Forbes: 35 to 50% of real estate sales go to the first responder. Wakeeli makes sure that is always you.

Would a 15-minute call make sense? I can walk you through exactly how it works for agencies your size.

Charbel

Content Pillars

PILLAR 1

Speed-to-Lead Education

Make agency owners feel the pain they did not know they had.

A lead texts a real estate agency at 10:47 PM.

By 10:52 PM, the competitor has already replied.

By 10:55 PM, the competitor has asked three qualifying questions and knows exactly what the lead wants.

By 11:00 PM, the lead has answered and feels understood.

By the next morning, the tour is booked.

You called back at 9:15 AM.

They told you they already found something.

This is not a maybe situation. Forbes tracked it: 35 to 50% of real estate sales go to the first responder. 21x higher conversion within 5 minutes.

That window is 5 minutes. You cannot staff that.

AI can.

PILLAR 2

Proof and Scale

Numbers build credibility. Post these often.

400,000 conversations.

36,000 appointments booked.

3 years.

That is what our AI DM system did for info coaches before I ever touched real estate.

The system did not close deals. It did something more valuable: it showed up before the lead could go cold.

It qualified. It answered questions. It matched the lead to the right offer. It sent the calendar link.

Human closer took it from there.

That split, AI handles volume, humans handle closing, works at every scale.

Now I am deploying it for real estate agencies.

Same system. Different product. Same result: more tours booked, fewer leads dropped.

PILLAR 3

Contrarian Takes on Agency Operations

Challenge the default. Drive engagement from operators.

Hiring another agent is not the answer to a slow lead response problem.

Agents are expensive, inconsistent, and unavailable at 2AM.

The best agencies I have seen do not win because they have more agents.

They win because every single lead gets touched immediately, without waiting for a human to be free.

Infrastructure beats headcount.

This is not a controversial opinion once you run the numbers.

PILLAR 4

AI Demystified for Real Estate

Educate without going technical. Remove the fear.

Agency owners ask me: "Will leads know they are talking to AI?"

Honest answer: some will. Most will not. But it does not matter as much as you think.

What leads actually care about: did someone reply fast? Did they understand what I want? Did they make it easy to take the next step?

Our AI does all three.

The conversation does not feel like a chatbot. It feels like a sharp assistant who knows the inventory and respects the lead's time.

By the time a human agent takes over, the lead is already warm.

That handoff is the whole game.

PILLAR 5

Builder Journey

Authenticity builds trust over time.

Six months into building Wakeeli.

One thing nobody tells you about pivoting an AI system from one industry to another: the tech is the easy part.

The hard part is learning how real estate leads actually think.

What they ask at 11PM. Why they ghost after one message. What makes them book a tour vs go cold.

I spent three years learning what moves info coaching leads.

I am spending this year learning real estate leads the same way.

The system is only as good as the conversation model behind it.

Building that is the real work.

Profile Optimization Checklist

BANNER IMAGE

Use a dark, high-contrast banner with one strong headline. Suggested copy: "When a lead texts your agency, they text 4 others. Wakeeli makes sure you reply first." Dark navy background matching the Wakeeli brand (#1a2744). Include the Wakeeli logo and a subtle WhatsApp interface visual. No stock photography, no generic gradients.

PROFILE PHOTO

Professional headshot. Plain or neutral background. Direct eye contact. No props, no casual framing. Positioning is serious operator, not startup personality.

HEADLINE

Use Option 1: Built the AI system behind 400K conversations and 36K appointments booked. Now deploying it for real estate agencies so the next lead texts you, not your competitor.

ABOUT SECTION

Use the full About copy from Section 02. Short paragraphs, no walls of text. The first two lines must be visible without clicking "see more" on mobile. Do not edit the opening line.

FEATURED SECTION

Publish all three post hooks as standalone posts first, then pin them to Featured. Pin order: Pin 2 (origin story) first, then Pin 1 (speed problem), then Pin 3 (positioning split).

EXPERIENCE SECTION

Founder

WAKEELI • 2025 TO PRESENT

Built and deployed an AI-powered WhatsApp conversion system for real estate agencies in the GCC and US. The AI qualifies inbound leads, matches them to listings, and books property tours automatically. Agencies never miss a lead regardless of time zone or agent availability.

Co-Founder and Head of Conversational Strategy

AI DM CENTER • 2021 TO 2024

Built and scaled an AI-powered DM operation for info coaches. Shaped the conversation architecture, qualification logic, and deployment strategy. The system handled 400,000 conversations and booked 36,000 appointments over three years. Strategy and systems thinking, not development.

Sales Strategist

HIGH-TICKET SALES • 2021 TO 2024

Three years closing and operating in high-ticket sales environments. Developed the understanding of lead psychology and conversion mechanics that now powers the Wakeeli system.

RECOMMENDATIONS STRATEGY

Target 3 to 5 recommendations before the first public case study launches.

Priority sources: Info coaching clients who witnessed the appointment volume. Real estate agency owners piloting Wakeeli (even informally). Sales or marketing professionals who worked alongside the AI DM operation.

What to ask them to mention: Speed of deployment, quality and volume of results, how conversations compared to human-only outreach, professionalism of the system handoff. Do not ask for generic endorsements. Give each person 2 to 3 specific sentences they can use or adapt.
