

CONFIDENTIAL STRATEGY DOCUMENT

WAKEELI

8-Week Launch

GCC + US Expansion | Target: First 5 Paying Clients

FOUR PHASES • 56 DAYS • FULL PLAYBOOK

GROWTH ROADMAP 2026

PHASE 1

Product Sprint + Foundation

Days 1 to 10

Developer fixes the chatbot

- List every specific bug or malfunctioning framework in writing before handing to dev
- Set a hard deadline: working demo by Day 7 max, not Day 10
- Daily check-in with dev (5 min, not a full meeting)
- Define "fixed" clearly: what does a fully working demo look like exactly?
- Test every conversation flow yourself before calling it done

Build LinkedIn profile (20 posts before outreach)

- Professional headshot, banner image (Wakeeli branded)
- Headline: outcome-driven ("Helping GCC Real Estate Agencies Never Miss a Lead")
- About section: your story + the problem you solve + social proof
- 2 to 3 posts/day: mix of real estate AI insights, founder journey, the problem Wakeeli solves
- Content themes: leads lost to slow response stats, WhatsApp in GCC real estate, AI in PropTech, founder building in public
- No pitching in posts. Pure value only at this stage.

Set up Sales Navigator

- Filter: title (Agency Owner, Broker, Managing Director, Founder), industry (Real Estate), location (UAE, Saudi Arabia, Qatar, Kuwait)
- Save searches, do not just browse
- Build a lead list of 200 to 300 targets minimum before outreach starts

Build prospect list (GCC first)

- Export Sales Navigator leads into a spreadsheet or Apollo
- For each: name, title, agency name, country, LinkedIn URL, agency Instagram link
- Tier them: A-list (large agencies, high volume), B-list (mid-size), C-list (small)
- Start outreach with B-list to sharpen your pitch before hitting A-list

Join GCC PropTech and real estate LinkedIn groups

- Search: "UAE Real Estate", "GCC PropTech", "Saudi Real Estate", "Dubai Property"
- Join 5 to 10 groups
- Do not post yet. Observe who is active. Add active members to your prospect list.
- These groups are also a source for connection requests with built-in context

Connect with 30 to 50 industry people a day

- Use a personalized connection note (1 line max): "Fellow PropTech founder, building AI for GCC real estate. Would love to connect."
- Target: agents, brokers, agency owners, PropTech people, real estate media
- Start at 20/day and scale up to avoid LinkedIn restriction on new accounts
- Track acceptance rate. If below 30%, rewrite your note.

Set up Calendly or Cal.com

- Every demo call needs a frictionless booking link ready before outreach starts

Record a 2 to 3 minute Loom walkthrough

- Even if product is not perfect yet. Use this in DMs instead of a wall of text.

Research top 20 GCC targets deeply

- Their Instagram, how they handle leads, their volume
- When you know their specific pain point, your connection request writes itself

Finalize the website

- Must be live and professional before any outreach. It is your credibility check.

PHASE 2

Outreach Launch

Days 11 to 20

Demo is working

- Run through every conversation flow yourself before showing anyone
- Test edge cases: no listing match, lead asks outside the script, language switching
- Record a clean 2 to 3 minute Loom of the demo
- Have a backup (screen share) ready in case live demo glitches on a call

20 to 30 personalized LinkedIn voice notes per day to GCC real estate agency owners

- Pull from your tiered prospect list (start with B-list)
- Before recording: look at their profile for 60 seconds. Find one specific thing.
- Voice note structure: 20 to 30 seconds max. "Hey [Name], saw you run [Agency] in [City]. I am building an AI that responds to WhatsApp leads in under 60 seconds so agencies never lose a deal to a slow response. Think it is relevant to you. Happy to show you a 10-minute demo if you are open to it."
- Never pitch the full product in the voice note. Just create enough curiosity to get a reply.
- Track responses in a spreadsheet: sent, replied, demo booked, no response

Warm before pitching

- 3 to 5 days before DMing a target: like one of their posts, leave one meaningful comment
- For top 20 A-list targets: do this religiously
- When your DM lands, they recognize your name. You are not a stranger anymore.

Connect deeply with top PropTech influencers

- Identify 10 to 15 people with 5K+ followers in GCC PropTech/real estate
- Engage with their content daily: comments that add value
- DM them as a genuine connection, not a sales pitch
- One repost from a GCC PropTech voice = more credibility than 200 cold DMs

Goal: 3 booked demos per week

- Track your pipeline daily: DMs sent, replies, demos booked, no-shows

- If week 1 ends with less than 3 demos: diagnose why. Message? Targeting? Voice note quality?
- Follow up once with everyone who did not reply after 3 days. One follow-up only.
- Treat each demo as a sales call: Calendly link ready, confirmation sent, demo rehearsed

First Clients

Days 21 to 35

First 3 pilots

- Close from your Phase 2 demo pipeline
- Prioritize agencies with visible WhatsApp links on their Instagram or website
- Set clear expectations upfront: pilot, you will be hands-on, they give feedback
- Onboard each one personally. White glove. You set up the chatbot, train it on their listings.

Offer founding price OR free first month

- Default offer: first month free, then founding price locked in for life
- Frame it: "You are one of my first 3 GCC clients. In exchange for case study rights and feedback, first month is free."
- Get written agreement (even WhatsApp confirmation) before work starts
- Never apologize for the price.

Build and document a case study

- Start documenting from Day 1, not after
- Capture: leads received, response time, tours booked, owner feedback
- Format: "Before Wakeeli: responding in 45 minutes average. After: under 60 seconds, 24/7."
- Format it into a 1-page PDF and a LinkedIn post. That is your Phase 4 weapon.

Get video testimonial and ask for referrals

- Ask at the moment of peak happiness, not at the end of the month
- Script for them: "Tell me the problem before, what changed after, and who you would recommend this to."
- 60 seconds on their phone camera is enough. Raw is fine.
- Referral ask: "Who are 2 to 3 other agency owners in Dubai or Riyadh you respect? I would love a warm intro."

Gameplan how to scale the product

- Map the onboarding process end to end and document every step
- Identify what took the most time and figure out how to systemize it
- Define what "ready for 10 clients simultaneously" looks like technically
- Set a capacity limit: how many clients can you handle in Phase 4 without the product breaking?

PHASE 4

Proof + Scale

Days 36 to 56

3 working clients with real data

- Pull data weekly: leads received, response time, conversations handled, tours booked
- Compare against the "before" numbers captured at onboarding
- This data is the foundation of everything in Phase 4

LinkedIn shifts from introducing Wakeeli to 30-day results from Agency X

- One post per pilot client showing real results
- Lead with the number that hits hardest: response time, leads handled, tours booked
- Format: problem they had, what changed, the number, their quote
- Repurpose in 3 formats: LinkedIn post, short Loom video, 1-page PDF for DMs

Outreach volume doubles

- Phase 2 was 20 to 30 DMs/day. Phase 4 is 40 to 60.
- Message changes completely: you are sharing a result, not pitching a product
- "One of my GCC clients went from 45-minute response times to under 60 seconds and booked 8 more tours last month. I have capacity for 2 more agencies this month. Want to see how it works?"
- Referral engine activates: every happy pilot client should be generating at least 1 intro

Gameplan and study US and AUS angle

- US: Instagram DMs, not WhatsApp. Research top real estate markets (Miami, LA, NYC, Dallas).
- AUS: Sydney and Melbourne luxury real estate. High property prices = high willingness to pay.
- For both: build the prospect list in Phase 4. Do not start outreach yet.
- Answer: does the product need any changes for US/AUS or does it work as-is?
- PR play: "Lebanese founder launches AI conversion platform for GCC real estate" is a real story. Pitch Wamda, ArabNet, Magnitt.
- Partnership with WhatsApp API provider (WATI/360dialog): rev-share for referrals from their GCC client base.
