

Wakeeli: Booking & Follow-Up Workflow

Charbel Salameh | Solo Founder Playbook

SECTION 1: QUALIFICATION QUESTIONS

Five questions. Natural, fast to fill out, just enough to prepare.

Q1: BROKERAGE NAME

Field type: Text (required)

Label: What's your brokerage called?

Why it matters: Charbel researches the brokerage before the call -- website, listings, social presence. The name is also pulled into every follow-up email for personalization.

Q2: TEAM SIZE

Field type: Dropdown (required)

Label: How many agents are on your team?

Options:

- Just me (solo agent)
- 2-5 agents
- 6-15 agents
- 16-30 agents
- 30+ agents

Why it matters: Agent count maps directly to pricing tier. 1-5 = Starter lead (\$149/mo). 6-15 = Professional target (\$599/mo). 16+ = Enterprise conversation (\$1,200/mo). Charbel knows which plan to lead with before the call starts.

Q3: MONTHLY LEAD VOLUME

Field type: Dropdown (required)

Label: How many inbound leads do you get per month, roughly?

Options:

- Under 50
- 50-150

- 150-500
- 500+
- Not sure

Why it matters: Volume determines the size of the problem. A brokerage generating 500+ leads and losing 30% to slow response has a six-figure revenue leak. One at 20 leads is a harder sell. This shapes the math Charbel runs on the call.

Q4: LEAD CHANNELS

Field type: Multi-select checkbox (required)

Label: How do most of your leads reach you right now?

Options:

- WhatsApp
- Website form or contact page
- Phone calls
- Referrals only
- Paid ads (Zillow, Google, Facebook)
- Social media DMs

Why it matters: WhatsApp-first brokerages are the ideal fit -- Wakeeli plugs in directly. Web form answers tell Charbel there is a gap between inquiry and first response (prime pitch angle). Multi-channel answers show operational complexity Wakeeli simplifies.

Q5: ATTRIBUTION

Field type: Dropdown (optional)

Label: How did you hear about Wakeeli?

Options:

- LinkedIn (post or profile)
- Someone referred me
- Google search
- Cold outreach from Charbel
- Other

Why it matters: Attribution data for future outreach strategy. Also tells Charbel the warm-up level of the prospect and how to open the call naturally.

SECTION 2: CALENDAR SETUP -- CAL.COM (FREE TIER)

Recommended tool: Cal.com

Free. No forced branding on the booking page. Better form customization than Calendly free. Zapier-compatible for future automation. Self-hostable if needed.

STEP 1: ACCOUNT SETUP

1. Sign up at cal.com with your business email (e.g. charbel@wakeeli.ai)
 2. Set your timezone: **Eastern Time (ET)** -- US brokerage owners are spread across ET, CT, MT, PT; ET is the universal anchor
 3. Upload a professional headshot -- not a logo. People book calls with people.
 4. Display name: **Charbel Salameh, Founder @ Wakeeli**
-

STEP 2: CREATE THE EVENT TYPE

1. Click "New Event Type" and select "One-on-One"
 2. **Event name:** See Wakeeli In Action (25 Min)
 3. **Duration:** 25 minutes (not 30 -- feels more respectful of their time, same substance)
 4. **Location:** Paste your permanent Zoom or Google Meet link
 5. **URL slug:** /charbel/wakeeli-demo
-

STEP 3: AVAILABILITY WINDOWS

Recommended schedule:

- Monday to Thursday: 9:00 AM to 12:00 PM ET and 2:00 PM to 5:00 PM ET
- Friday: Blocked (reserved for outreach, follow-ups, and admin)

Reasoning:

- Blocking 12 to 2 PM prevents back-to-back fatigue and forces a real break
- Avoiding Fridays protects one full day per week for non-call work
- Morning slots consistently show higher attendance rates for US professionals
- 6 slots per day maximum, capped at 3 calls (with buffer time -- see Step 4)

Buffer time: 15 minutes after each call. Non-negotiable. You need time to send the follow-up while the conversation is fresh, take notes, and reset before the next one.

Max calls per day: Set to 3 in Cal.com settings. More than that as a solo founder and your conversion quality drops.

STEP 4: BOOKING PAGE DESCRIPTION

This is what prospects see before they book. Outcome-led. No feature list.

Your agents are probably responding to leads hours after they come in. By then, half of those people have already talked to someone else.

Wakeeli is an AI system that responds to every WhatsApp lead within 60 seconds -- 24 hours a day, 7 days a week. It qualifies the lead, answers questions, and books property tours automatically. Your agents only step in when someone is ready to see a home.

In this 25-minute call, I'll show you exactly how it works and what the numbers could look like for your brokerage. No deck. No pressure. Just a live demo and a straight conversation.

Pick a time that works for you.

STEP 5: ADD THE QUALIFICATION QUESTIONS

In Cal.com, go to "Booking Questions" after creating the event:

1. Your brokerage name -- text, required
 2. How many agents on your team? -- dropdown, required
 3. Monthly inbound leads, roughly? -- dropdown, required
 4. How do most leads reach you? -- multi-select, required
 5. How did you hear about Wakeeli? -- dropdown, optional
-

STEP 6: CONFIRMATION PAGE MESSAGE

The screen prospects see immediately after booking:

You're booked. I'll see you on [Date] at [Time] ET.
A confirmation email with the call link is on its way -- check your inbox (and spam, just in case).
No prep needed. Come as you are. I'll do the heavy lifting.
-- Charbel

STEP 7: CALENDAR INTEGRATION

Connect your Google Calendar or Outlook under Settings. Enable "Prevent Double Bookings." This ensures Cal.com respects existing events and never double-books you.

STEP 8: REMINDER AUTOMATION (FREE SETUP)

Email reminders: Cal.com free tier includes automated email reminders. Set:

- 24-hour reminder: ON
- 1-hour reminder: ON (use the SMS instead -- see Section 3C -- but email backup is fine)

SMS reminders: Cal.com free tier does not include SMS. Options:

- Use a free Twilio number + Zapier free tier to trigger the 1-hour SMS
 - Or send it manually -- it takes 30 seconds and the personal touch is worth it
-

SECTION 3: ALL EMAIL AND SMS COPY

All copy follows Sabri Suby principles: short sentences, outcome-led, personal tone, zero corporate filler.

A. CONFIRMATION EMAIL

Trigger: Immediately after booking (automated)

Subject: You're booked, [First Name]. Here's what to expect.

Hi [First Name],

You're on the calendar.

[Day], [Month Date] at [Time] ET

[Zoom/Meet link]

Here's what we'll cover in 25 minutes:

- A live demo of Wakeeli responding to a real WhatsApp lead in real time
- What the numbers could look like specifically for [Brokerage Name]
- Whether a free 30-day pilot makes sense for you

Nothing to prepare. Come as you are.

If anything changes, reschedule here: [reschedule link]

See you then.

Charbel Salameh

Founder, Wakeeli

B. REMINDER EMAIL -- 24 HOURS BEFORE

Trigger: 24 hours before the scheduled call (automated)

Subject: Tomorrow at [Time] ET -- quick note from Charbel

Hi [First Name],

Quick reminder -- we're on tomorrow at [Time] ET.

[Zoom/Meet link]

One thing worth thinking about before we talk: what happens when a lead messages [Brokerage Name] at 9 PM on a Saturday?

That's exactly the gap we'll look at fixing on the call.

See you tomorrow.

Charbel

C. REMINDER SMS -- 1 HOUR BEFORE

Trigger: 60 minutes before the scheduled call

Channel: SMS (Twilio or manual)

Max 2 lines.

Hey [First Name], we're on in an hour. Here's the link: [Zoom/Meet link]

See you at [Time] ET. -- Charbel, Wakeeli

D. NO-SHOW EMAIL -- 30 MINUTES AFTER MISSED CALL

Trigger: 30 minutes after scheduled start, no-show detected

Subject: Missed you today, [First Name]

Hi [First Name],

Looks like we missed each other -- no worries at all. Things come up.

If you want to find another time that works better: [booking link]

Or just reply and let me know when you'd like me to reach back out.

Charbel

E. NO-SHOW FOLLOW-UP -- DAY 2

Trigger: Day 2 after the no-show

Subject: Still worth 25 minutes, [First Name]

Hi [First Name],

Wanted to follow up in case yesterday just got away from you.

Here's the stat that keeps coming up in my conversations with brokerage owners: the average US brokerage loses over 36,000 appointments per year to slow or missed lead response. That's not a lead quality problem. That's a speed problem.

Wakeeli fixes that automatically. I'd like to show you how it would work for [Brokerage Name].

Book a new time here: [booking link]

Charbel

F. NO-SHOW FINAL EMAIL -- DAY 5

Trigger: Day 5 after the no-show

Subject: Closing the loop, [First Name]

Hi [First Name],

Last note from me on this one.

I know running a brokerage is full-on and schedules fall apart. No pitch here -- just a genuine question: is this still worth a conversation, or is the timing just not right?

Either way, I appreciate you booking in the first place. If you want to reconnect down the road, my link is always open: [booking link]

Wishing [Brokerage Name] a strong rest of the year.

Charbel

Wakeeli

G. POST-CALL FOLLOW-UP -- SAME DAY (INTERESTED, DID NOT COMMIT)

Trigger: Same day, within 2 hours of the call ending (manual)

Subject: The math from today's call, [First Name]

Hi [First Name],

Great talking with you today.

Here's what we ran through, in writing:

The problem:

[Brokerage Name] is generating leads. Some of them are falling through the gap between inquiry and first response. Every one of those is real commission walking out the door.

The math:

- Average US commission: \$8,000-\$12,000 per transaction
- Leads lost to slow response (conservative): 3-5 per month
- Wakeeli Professional plan: \$599/month
- Potential recovered commission: \$24,000-\$60,000/month

The offer:

30 days free. No setup fee. No credit card. If it doesn't deliver, you walk away and owe nothing.

The next step:

Reply with a YES and I'll send you the onboarding link today.

Charbel

H. POST-CALL FOLLOW-UP -- DAY 3 (STILL THINKING)

Trigger: Day 3 after the call, no response (manual)

Subject: One thing worth knowing, [First Name]

Hi [First Name],

Just checking in -- no pressure.

Something relevant that came up after our call:

Forbes found that 35-50% of sales go to the first vendor to respond. In real estate, that window is even tighter -- conversion drops off sharply after 5 minutes.

Most brokerages don't have a lead problem. They have a response speed problem.

If you're still thinking through the pilot, I'm here. Just reply and we'll sort out the details.

Charbel

I. POST-CALL FINAL FOLLOW-UP -- DAY 7

Trigger: Day 7 after the call, no response (manual)

Subject: Last note, [First Name]

Hi [First Name],

This is my last follow-up. I don't want to crowd your inbox.

If the timing isn't right, I completely understand. The offer stands whenever you're ready -- 30 days free, no commitment, no card required.

If you want to move forward, reply with a YES and I'll get you set up today.

If not, no hard feelings. I hope [Brokerage Name] has a strong year ahead.

Charbel

Wakeeli

wakeeli.ai

SECTION 4: THE FULL WORKFLOW MAP

Every touchpoint in order. What triggers what. What is automated vs. what Charbel does manually.

PHASE 1: OUTREACH TO BOOKING

Step 1 [Manual] -- Charbel connects with brokerage owner on LinkedIn

Step 2 [Manual] -- Charbel sends a short, outcome-led message. No pitch. One line on what Wakeeli does and a question about whether they are open to a quick call.

Step 3 [Manual] -- Prospect replies with interest. Charbel sends the booking link: cal.com/charbel/wakeeli-demo

Step 4 [Automated] -- Prospect fills out the 5-question form and selects a time slot on Cal.com.

Step 5 [Automated] -- Confirmation email fires immediately (Cal.com).

Step 6 [Manual, 10 min] -- Charbel receives the booking notification. Reviews the form answers. Looks up the brokerage online -- website, listings, Google Maps reviews, social presence. Notes agent count and lead volume to shape the call.

PHASE 2: PRE-CALL SEQUENCE

Step 7 [Automated] -- 24-hour reminder email fires (Cal.com).

Step 8 [Automated or Manual] -- 1-hour reminder SMS fires (Twilio + Zapier, or Charbel sends manually).

Step 9 [Manual] -- Charbel joins the Zoom/Meet link 2 minutes early.

PHASE 3: THE 25-MINUTE CALL

Step 10 [Manual] -- Charbel runs the demo using this structure:

- **Min 0-2:** Open with their specific situation using form answers ("You mentioned most leads come in via WhatsApp -- how is your team handling that right now?")
- **Min 2-7:** Live demo of Wakeeli responding to a WhatsApp lead in real time
- **Min 7-17:** "What could this look like for [Brokerage Name]?" -- run the math together
- **Min 17-22:** Handle objections
- **Min 22-25:** Close -- "I'd like to run a free 30-day pilot with you. Can we start this week?"

Step 11 -- Three possible outcomes:

- **YES:** Move directly to Phase 5 (pilot onboarding)
 - **MAYBE / THINKING:** Move to Phase 4A (post-call follow-up)
 - **HARD NO:** Thank them, close gracefully, note the account for a future re-engage in 90 days
-

PHASE 4A: POST-CALL FOLLOW-UP (NOT YET COMMITTED)

Step 12 [Manual] -- Same-day follow-up email with the math (sent within 2 hours of the call -- Section 3G)

Step 13 [Manual] -- Day 3 follow-up with one new insight (Section 3H)

Step 14 [Manual] -- Day 7 final follow-up (Section 3I)

If no response after Day 7: mark as "re-engage in 60 days" and move on.

PHASE 4B: NO-SHOW RECOVERY

Step 12b [Manual or Automated] -- 30-minute no-show email (Section 3D)

Step 13b [Manual] -- Day 2 follow-up with social proof stat (Section 3E)

Step 14b [Manual] -- Day 5 final re-engage or close loop (Section 3F)

If prospect rebooks: return to Phase 2. If no response: mark as "re-engage in 30 days."

PHASE 5: PILOT ONBOARDING (YES SECURED)

Step 15 [Manual] -- Charbel sends onboarding document (PDF or Notion page) with next steps and what to expect in the 30 days.

Step 16 [Manual + Shared Screen] -- WhatsApp Business API connection setup, guided by Charbel. Typically 30-45 minutes.

Step 17 [Manual, Weekly] -- 30-day free pilot runs. Charbel monitors manually. Sends one weekly check-in message with any highlights (leads responded, tours booked).

Step 18 [Manual] -- Day 25 check-in call. Review actual results. Present paid plan options. Close the conversion to a paying client.

AUTOMATION VS. MANUAL SUMMARY

Touchpoint	Automated	Manual
Booking confirmation email	Cal.com	
24-hour reminder email	Cal.com	
1-hour reminder SMS	Twilio + Zapier	Or Charbel sends
No-show 30-min email	Optional (Zapier)	Charbel sends
No-show Day 2 email		Charbel sends
No-show Day 5 email		Charbel sends
Same-day post-call email		Charbel sends
Day 3 follow-up email		Charbel sends
Day 7 final follow-up		Charbel sends
Pre-call research		Charbel (10 min)
The demo call		Charbel
Pilot onboarding		Charbel
Weekly pilot check-in		Charbel
Day 25 conversion call		Charbel
